DETAILED ACTION

Allowable Subject Matter

1. Claims 1-12, 14-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: with respect to claims 1 and 14, in addition to other limitations in the claims, the prior art of record fails to teach, disclose or render obvious the applicant's invention as claimed, particularly the feature describing a switch electrically connected between the output driver and the pad, the switch electrically isolating the output driver from the pad in the writing mode and electrically connecting the output driver to the pad in the reading mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. Spence (5,736,887) discloses an output driver having a transmission transistors connected to a pad, but transmission transistors does not isolating the output driver from the pad in the writing mode and electrically connecting the output driver to the pad in the reading mode.

5. Miki et al (5,631,579) discloses an output buffer having a switch transistor connected to a pad and isolated the buffer during high impedance state, but the switch transistor does not isolating the output driver from the pad in the writing mode and electrically connecting the output driver to the pad in the reading mode.
